

Federal Republic of Germany

Rating Report

Rating rationale

Wealthy, large, and diversified economy: Germany's economy proved resilient during the Covid-19 pandemic and the energy crisis. However, the country's high value-added, export-oriented, energy imports-dependent economy has been slow to recover compared with peer countries due to persistent high energy prices and ongoing trade tensions. We expect real GDP growth of 0.3% this year before picking up to an average 1.2% over 2026-2030 as implementation of the federal government's infrastructure special fund progresses and other measures, such as the 'growth-booster', moderately support growth.

Robust fiscal framework: Germany's solid fiscal policy framework and strong record of fiscal discipline are anchored by its constitutional debt brake. Following wide-ranging amendments to the debt brake in early 2025, the federal government will significantly increase borrowing to fund infrastructure investment and defence spending in coming years. We expect the debt-to-GDP ratio to increase from 62.1% in 2024 to around 70% by 2030.

Highly competitive external sector: The economy's external strength is reflected in its large and persistent current account surplus, standing at 5.7% of GDP in 2024. The current account surplus is expected to remain slightly below pre-pandemic levels in the medium term.

Rating challenges include: i) implementation of structural reforms and transition risks for energy-intensive industries given carbon neutrality targets; ii) an ageing population, resulting in rising pension liabilities and downward pressure on the country's medium-term growth potential; and iii) vulnerabilities related to global geopolitical risks.

Figure 1: Germany's sovereign-rating drivers

Risk pillars		Quantitative		Reserve currency*	Political risk**	Qualitative****	Final rating
		Weight	Indicative rating	Notches	Notches	Notches	
Domestic economic risk		35%	aaa	EUR	Germany	-1/3	AAA
Public finance risk		20%	a+			0	
External economic risk		10%	aaa			2/3	
Financial stability risk		10%	aaa			1/3	
ESG risk	Environmental factors	5%	a+	[+1]	[-0]	- 1/3	
	Social factors	7.5%	b			0	
	Governance factors	12.5%	aaa			0	
Sovereign Quantitative Model***		aaa				+0	
Additional considerations						0	

*The reserve-currency quantitative adjustment applies to currencies in the IMF's Special Drawing Rights (SDR) basket.

**The political-risk quantitative adjustment is based on the World Bank's Political Stability & Absence of Violence/Terrorism index.

***Scope's SQM signals an indicative credit rating of 'aaa' for Germany, which was approved by the rating committee.

****The qualitative scorecard analyst adjustments, capped at one notch per rating pillar, are weighted equally with an aggregate adjustment rounded to the nearest integer. For details, please see Scope's [Sovereign Rating Methodology](#).

Domestic economic risk

Overview of Scope's assessments of Germany's Domestic Economic Risk

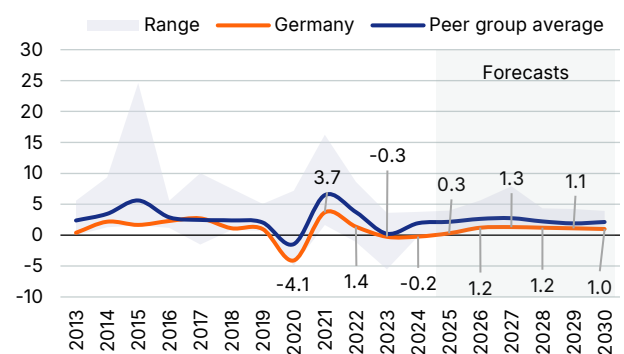

SQM ¹ indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
aaa	Growth potential and outlook	Weak	-1/3	Demographic challenges, large investment gap and structural challenges in key industries but medium-term boost through fiscal package expected
	Monetary policy framework	Neutral	0	ECB is a highly credible and effective central bank; effective policy framework and transmission over the cycle
	Macroeconomic stability and sustainability	Neutral	0	Competitive and diversified economy but weaknesses in digitalisation, labour market challenges related to ageing; high resource dependence and trade links with other countries

Public finance risk

Overview of Scope's assessments of Germany's Public Finance Risk

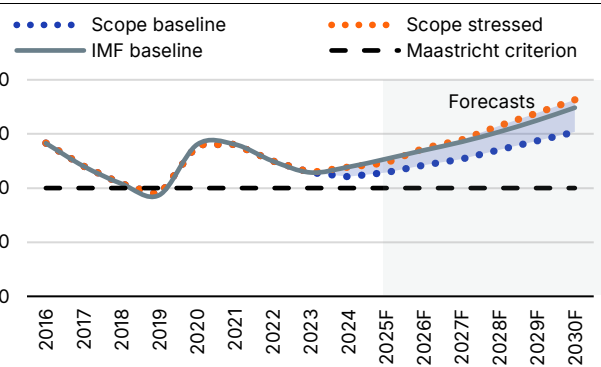

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
a+	Fiscal policy framework	Neutral	0	Constitutionally anchored debt brake at federal and regional level; strong policy response aimed at raising defence spending and infrastructure investment
	Long-term debt trajectory	Weak	-1/3	Moderate public debt with high resilience to adverse scenarios; rising debt trajectory to fund defence and infrastructure spending; rising pension liabilities
	Debt profile and market access	Strong	1/3	Primary benchmark issuer in euro area, reflected in low interest payments despite heightened debt levels

Financial stability risk

Overview of Scope's assessments of Germany's *Financial Stability Risk*

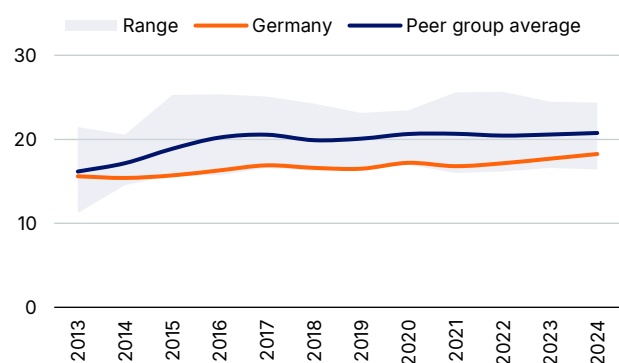

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
aaa	Banking sector performance	Neutral	0	Low return on equity and unfavourable cost structure of banking sector balanced by adequate capitalisation and moderate exposure risk to nonfinancial corporate debt
	Financial sector oversight and governance	Neutral	0	Oversight under National Supervisory Authority and ECB as part of banking union
	Financial imbalances	Strong	1/3	Moderate household and private sector indebtedness; closely monitored systemic risks in financial system

Environmental, Social and Governance (ESG) risk

Overview of Scope's assessments of Germany's ESG Risk

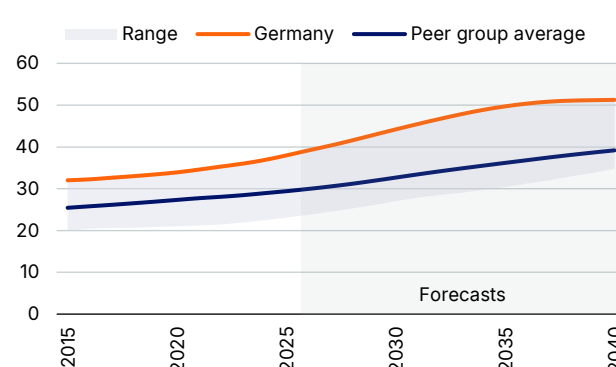

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
aa-	Environmental factors	Weak	- 1/3	Structural challenges related to transition risk given carbon neutrality targets and economic importance of energy-intensive key industries
	Social factors	Neutral	0	Weak demographics given an ageing workforce, balanced by high social inclusion and improving labour force participation; inequality risks in line with peers
	Governance factors	Neutral	0	High-quality institutions but increasingly fragmented political environment
