Public rating | 25 July 2025

# Republic of Ireland

## Rating report

#### **Rating rationale**

Wealthy and internationally competitive economy: Ireland benefits from its high wealth levels and competitive economy, supported by high value-added sectors such as pharmaceuticals and information and communication technology, which underpin the country's robust growth potential. However, trade tensions and shift in the strategy of multinational enterprises are downside risks.

Track record of fiscal consolidation: Continued fiscal surpluses, downward debt trajectory and the long maturity of government debt support the rating. The establishment of the Future Ireland Fund and the Infrastructure, Climate and Nature Fund should further support fiscal policy to tackle challenges related to an ageing population, capital investment needs, and climate change.

Strong institutional environment: Ireland has a strong institutional framework, a favourable business environment attracting foreign investment and an effective rule of law. Following snap general election in November 2024, the government coalition between Fianna Fáil and Fine Gael is expected to anchor policy continuity and stability until next election scheduled for end-2029.

Euro-area and European Union member: Euro-area and European Union membership supports high-growth economic model, helping to attract and retain foreign investment. It also provides access to lenders of last resort via the European Central Bank and the European Stability Mechanism.

Rating challenges: i) strong dependence on multinational enterprises whose highly concentrated corporate tax contributions account for a significant portion of government revenue; ii) the economy's vulnerability to sudden international shocks, including from key trade partners; iii) supply-side constraints limiting capital investment spending to tackle key infrastructure needs and build up public services; and iv) high private and external debt levels.

#### Figure 1: Ireland's sovereign-rating drivers

Diele	Risk pillars		Quantitative		Political risk**	Qualitative***	Final
RISK J			Indicative rating	Notches	Notches	Notches	rating
Dome	stic economic risk	35%	aa+			0

Sovereign Quantitative Model****			é	aa		-1	
Addit	ional considerations****	*				-1	

\* The reserve-currency quantitative adjustment applies to currencies in the IMF's Special Drawing Rights (SDR) basket. \*\* The political-risk quantitative adjustment is based on the World Bank's Political Stability & Absence of Violence/Terrorism index.

\*\*\* The qualitative scorecard analyst adjustments, capped at one notch per rating pillar, are weighted equally with an aggregate adjustment rounded to the nearest integer. \*\*\*\* The Rating Committee approved an indicative rating of 'aaa'.

\*\*\*\*\* A one-notch negative adjustment is applied to capture distortions in Irish economic data that tend to overstate the performance of underlying fundamentals and credit metrics of Ireland.

## **Credit strengths and challenges**

Credit stre	naths
Credit Stre	iiguis

- Wealthy and internationally competitive economy
- Track record of fiscal discipline, favourable debt profile
- Strong institutional environment
- Euro-area and European Union membership

#### **Credit challenges**

- Strong dependence on multinational enterprises
- Vulnerability to sudden international shocks
- Supply-side constraints limiting capital investment spending
- High private and external debt levels

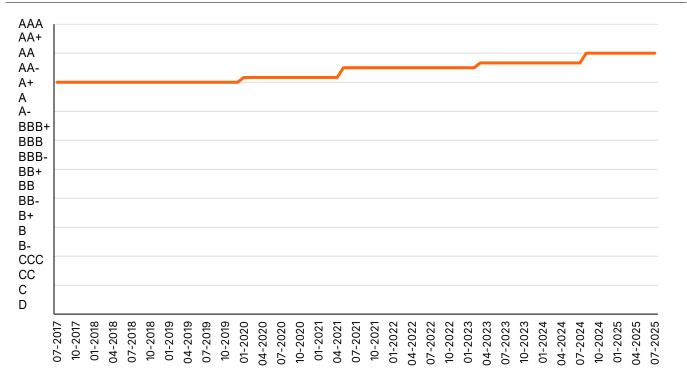

financial stability

### **Outlook and rating triggers**

The Stable Outlook reflects Scope's view that risks to the ratings are balanced.

Positive rating-change drivers	Negative rating-change drivers
• Vulnerabilities to public finances reduce significantly, including a more diversified tax revenue base	Weaker fiscal outlook and/or reversal of declining trend in debt-to-GNI* ratio
Vulnerabilities related to external demand and financial-system risks reduce substantially	Substantially weaker-than-expected medium-term economic growth outlook
	<ul> <li>Private-sector and financial system risks increase meaningfully, impacting long-term macro-economic and</li> </ul>

## Domestic economic risk

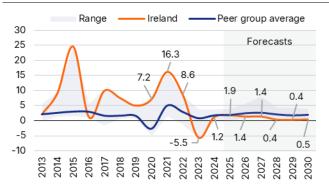

#### Overview of Scope's assessments of Ireland's Domestic Economic Risk

SQM <sup>1</sup> indicative rating	SQM <sup>1</sup> indicative rating Analytical component		Notch adjustment	Rationale
	Growth potential and outlook	Strong	+1/3	Strong growth potential but uncertainty related to long-term impact of trade tensions for key sectors
aa+	Monetary policy framework	Neutral	0	ECB is a highly credible and effective central bank; effective policy framework and transmission over the cycle
	Macroeconomic stability and sustainability	Weak	-1/3	Economic structure subject to high volatility related to trade tensions and decisions from multinational enterprises

#### Figure 3: Nominal GDP and GDP per capita (2024E)

#### Figure 4: Real GDP growth, %

## **Public finance risk**

#### Overview of Scope's assessments of Ireland's Public Finance Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
	Fiscal policy framework	Neutral	0	Prudent fiscal policies with self-imposed fiscal framework; setup of two long-term savings funds; suitable fiscal responses to recent shocks
ааа	Long-term debt trajectory	Strong	+1/3	Declining public sector debt levels supported by high corporate tax revenues from multinational enterprises
	Debt profile and market access	Neutral	0	Strong market access and debt structure, large and liquid cash reserves, access to lenders of last resort

## **External economic risk**

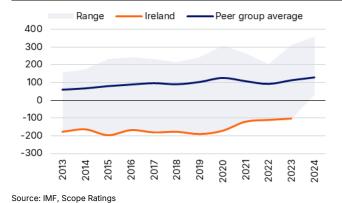

#### Overview of Scope's assessments of Ireland's External Economic Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
	Current account resilience	Weak	-1/3	Volatile current account due to contract manufacturing and intellectual property-related imports; attractive destination for FDIs but longer-term risks from a shift in multinationals' corporate structures
bb-	External debt structure	Weak	-1/3	External debt levels declining but still higher than those of peers; significant short-term external debt
	Resilience to short-term external shocks	Weak	-1/3	Benefits from euro-area membership but exposed to global shocks as a small, opened economy

#### Figure 7: Current-account balance, % of GDP

#### Figure 8: Net international investment position (NIIP), % GDP

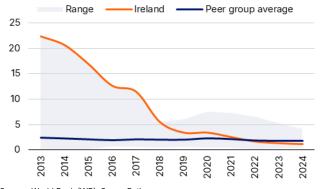

## **Financial stability risk**

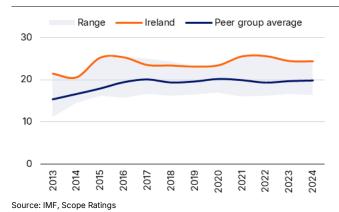

#### Overview of Scope's assessments of Ireland's Financial Stability Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
	Banking sector performance	Neutral	0	Significantly improved banking-system resilience, based on robust financial ratios in line with peers
ааа	Financial sector over- sight and governance	Neutral	0	Oversight under the Central Bank of Ireland and the ECB as part of banking union
	Financial imbalances	Weak	-1/3	Elevated private sector debt, risks from global financial-market interconnections and large size of Irish financial system including non-bank sector

#### Figure 9: Non-performing loans (NPLs), % of total loans

#### Figure 10: Tier 1 capital, % of risk-weighted assets

Source: World Bank (WB), Scope Ratings

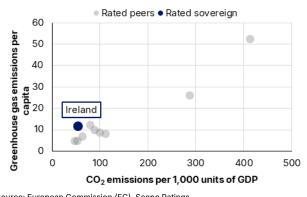

## Environmental, Social and Governance (ESG) risk

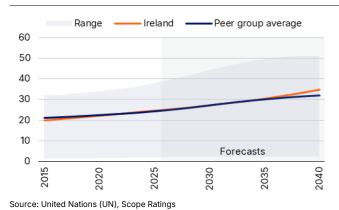

#### Overview of Scope's assessments of Ireland's ESG Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
	Environmental factors	Neutral	0	Mixed record on environmental sustainability; however, ambitious climate action objectives
aa+	Social factors	Weak	-1/3	Favourable demographics; pressure on local infrastructures and public services (education, transport, housing, healthcare)
	Governance factors	Neutral	0	Stable political environment; policy continuity expected until next election scheduled for end-2029

## **Political-risk adjustment**

Figure 13: WB Political Stability & Absence of Violence/Terrorism index, Ireland, 3-year moving average

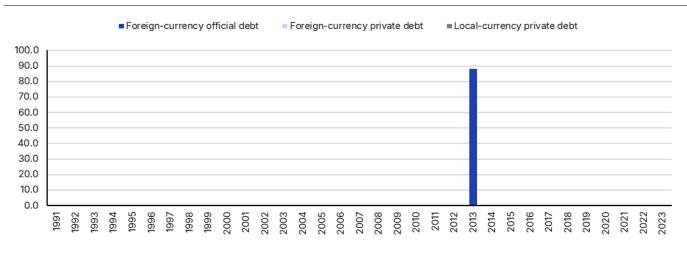

Source: WB, Scope Ratings

## **Additional considerations**

Some of Ireland's standard economic variables, including GDP, provide an inaccurate picture of domestic economic activity in the country due to the large multinational enterprise sector. To better reflect underlying economic activity, authorities calculate modified figures. For example, modified GNI (or GNI\*) adjusts the GDP figures to exclude net profits of companies that have been sent abroad, as well as depreciation on intellectual property, depreciation on leased aircraft and the net income of redomiciled PLCs (i.e. a company that owns large subsidiary companies which are still established overseas). To account for the modified economic variables, which are not fully captured by Scope's Sovereign Quantitative Model, one additional downwards notch is applied.

## Appendix 1. Sovereign default history

5y USD CDS spread (bp) as of 24 July 2025	18.44

## Appendix 4. Statistical table for selected SQM indicators

This table presents a selection of the indicators (24 out of 30 – with the governance indicator reflecting a composite of five indicators) used in Scope's quantitative model, in line with Scope's Sovereign Rating Methodology. The metrics and sources for the data presented here ensure comparability across global country peers and may therefore differ from data from national and other select international statistical series.
