

# Republic of Serbia

## Rating report

### Rating rationale

**Solid GDP growth supported by resilient FDI inflows and strengthened external position:** Serbia's economy grew by 3.9% in 2024, though momentum slowed in early 2025 due to weak external demand, political unrest, and global uncertainty. Scope forecasts growth of 2.9% in 2025, rebounding to 3.7% in 2026, supported by public investment and resilient FDI in manufacturing and ICT. While reserves are rising and external debt declining, external vulnerabilities persist due to high leverage and reliance on foreign capital.

**Moderate public debt and favourable debt profile:** Serbia's public debt remains moderate, with the debt-to-GDP ratio projected to decline gradually from 44.5% in 2024 to 43.9% by 2030, supported by modest deficits and contained interest costs. The debt profile is characterised by long maturities, a high share of fixed-rate debt, and stable support from multilateral lenders.

**Political volatility and weakening reform outlook:** Serbia's political outlook has weakened following the resignation of Prime Minister Miloš Vučević in early 2025 amid widespread protests over governance and accountability. Although a new government has been formed, elevated political fragmentation and reduced consensus-building capacity threaten to stall structural reforms. This growing political uncertainty undermines policy predictability and reduces the likelihood of accelerated progress on EU accession.

**Rating challenges:** i) elevated external vulnerabilities due to high external debt and a prevalence of foreign currency in the financial sector; ii) institutional weaknesses and geopolitical complexities associated with Serbia's EU membership aspirations; and iii) uncertainties about its access to and cost of its energy security following the imposition of US sanctions on Gazprom Neft and its subsidiaries, including Serbia's NIS, majority-owned by Gazprom Neft.

Risk pillars		Quantitative		Reserve currency*	Political risk**	Qualitative****	Final rating
		Weight	Indicative rating	Notches	Notches	Notches	
Domestic economic risk		35%	a-	RSD	Serbia	1/3	BB+
Public finance risk		20%	aa+			0	
External economic risk		10%	cc			- 1/3	
Financial stability risk		10%	aaa			- 1/3	
ESG risk	Environmental factors	5%	b	[+0]	[-1]	0	
	Social factors	7.5%	ccc			0	
	Governance factors	12.5%	b+			- 1/3	
Sovereign Quantitative Model***		bbb-				-1	
Additional considerations						0	

\*The reserve-currency quantitative adjustment applies to currencies in the IMF's Special Drawing Rights (SDR) basket.

\*\*The political-risk quantitative adjustment is based on the World Bank's Political Stability & Absence of Violence/Terrorism index.

\*\*\* Scope's SQM signals and indicative credit rating of 'bbb-', which was approved by the rating committee.

\*\*\*\*The qualitative scorecard analyst adjustments, capped at one notch per rating pillar, are weighted equally with an aggregate adjustment rounded to the nearest integer. For details, please see Scope's [Sovereign Rating Methodology](#).

## Credit strengths and challenges

### Credit strengths

- Well-established macroeconomic policy framework with a good record of sustained and balanced growth rates
- Moderate public debt, effective budget management
- Strong FDI inflows

### Credit challenges

- Elevated external vulnerabilities due to high external debt and high FX share of debt
- Political uncertainty, institutional weaknesses, slow progress on structural reforms
- Uncertainties regarding access to and cost of energy security

## Outlook and rating triggers

The Stable Outlook reflects the view that risks for the ratings are balanced.

### Positive rating-change drivers

- Governance and/or political risks eased, resulting in material progress towards accession to the EU
- External position further strengthened, due to robust exports or increased net FDI inflows
- Debt/GDP ratio set on a firm downward trajectory over the medium run

### Negative rating-change drivers

- Governance and/or political risks increased, affecting the quality and predictability of policymaking
- Increase in external vulnerabilities, weighing on reserve adequacy
- Steady increase in debt/GDP ratio in the medium run

## Domestic economic risk

### Overview of Scope's assessments of Serbia's Domestic Economic Risk

SQM <sup>1</sup> indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
a-	Growth potential and outlook	Strong	1/3	Solid medium-run growth potential of 4.0%, supported by steady net FDI
	Monetary policy framework	Neutral	0	Pre-crisis record of managed inflation, adequate monetary policy
	Macroeconomic stability and sustainability	Neutral	0	Improved macro-economic stability, but relatively low domestic savings

## Public finance risk

### Overview of Scope's assessments of Serbia's Public Finance Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
aa+	Fiscal policy framework	Neutral	0	Pre-crisis record of fiscal prudence; development of new fiscal-rules framework and ongoing IMF policy support anchor fiscal discipline; high public investments
	Long-term debt trajectory	Neutral	0	Stable debt trajectory over medium run, but exposure to significant exchange-rate risk
	Debt profile and market access	Neutral	0	Long maturities and high share of multilateral, institutional debtholders but elevated share of FX debt

<sup>1</sup> Sovereign Quantitative Model

## External economic risk

### Overview of Scope's assessments of Serbia's External Economic Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
CC	Current account resilience	Neutral	0	High investment needs with low domestic savings
	External debt structure	Neutral	0	Large current account deficits are largely financed by FDI inflows
	Resilience to short-term external shocks	Weak	- 1/3	Strong reserve coverage; reliance on foreign capital and shallow domestic capital markets, high external leverage, energy dependence and concentration risk

Figure 7: Current-account balance, % of GDP

Figure 8: Net international investment position (NIIP), % GDP

Source: IMF, Scope Ratings

## Financial stability risk

### Overview of Scope's assessments of Serbia's Financial Stability Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
aaa	Banking sector performance	Neutral	0	Mostly foreign-owned, well-capitalised and liquid banking sector; low contingent liability risk to the sovereign balance sheet
	Financial sector oversight and governance	Neutral	0	Conservative banking framework supports overall stability in the system, macroprudential tools framework regarded as 'equivalent' to the EU one
	Financial imbalances	Weak	- 1/3	High euroisation of deposits and loans (at around 50% of the total) represents a financial stability concern

Figure 9: Non-performing loans (NPLs), % of total loans

Source: World Bank (WB), Scope Ratings

Figure 10: Tier 1 capital, % of risk-weighted assets

Source: IMF, Scope Ratings

## Environmental, Social and Governance (ESG) risk

### Overview of Scope's assessments of Serbia's ESG Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
b-	Environmental factors	Neutral	0	Increasing use of renewable energy sources; still elevated energy reliance on coal
	Social factors	Neutral	0	An ageing population and elevated youth unemployment constrain labour supply
	Governance factors	Weak	- 1/3	Limited progress on EU accession reforms, lack of tangible progress towards a sustainable settlement with Kosovo, recent public unrest
