

## **Credit strengths**

- Highly rated shareholders
- Substantial capital position
- Very high liquidity buffers
- Excellent access to capital markets

### **Credit challenges**

- Crisis-country exposure and concentrated loan portfolio
- Concentrated shareholder base

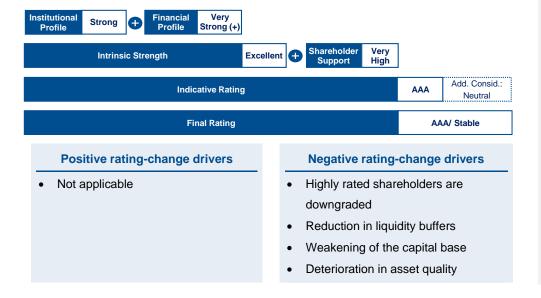

Rating rationale and Outlook: The European Stability Mechanism's (ESM) AAA rating reflects its 'excellent' intrinsic strength and 'very high' shareholder support. In detail:

- Institutional profile: The ESM has a proven track record of excellent governance and a very strong mandate for its shareholders, occupying a key position within the euro area institutional framework.
- Financial profile: The ESM is highly capitalised and benefits from strong capitalisation and prudent risk management practices. Its liquid assets ratio of 205% stands out as one of the highest among rated peers, shielding it from refinancing risk.

The ESM's mandate to provide support to member states undergoing severe funding crises results in a highly concentrated borrower base and weak profitability. It benefits from strong risk mitigants however, including preferred creditor status.

- Shareholder support: The ESM benefits from a diversified, highly rated shareholder base. More than half of its capital is held by sovereigns rated AA- or higher.
- Outlook and triggers: The Stable Outlook reflects Scope's view that risks are balanced over the next 12 to 18 months. The ratings/Outlooks could be downgraded if, individually or collectively: i) highly rated key shareholders are downgraded; ii) liquidity buffers are significantly reduced; iii) there is a significant weakening in the capital base as a result of sustained losses caused by missed payments from borrowers and/or a material increase in the maximum lending capacity; and/or iii) the asset quality of the loan portfolio deteriorates significantly.

# I Indicative rating: European Stability Mechanism

## **Indicative rating: AAA**

Scope first maps the assessments for the institutional and financial profiles to determine the supranational's intrinsic strength. As the second step, Scope then maps this assessment against shareholder support to determine the indicative rating.
