

Italian NPL collections note sales fall to almost zero in February:

February 2024 Italian NPL collections of EUR 114m were 15% up month-on-month but 18% below the February average of the three previous years.

Note sales fell to virtually zero (EUR45k) compared to an average of EUR 11m in the same month of the three previous years. This is the lowest since we started publishing this monthly report in April 2020 and continues the decreasing trend we outlined in 2023.

And while collections from judicial strategies and DPOs in February were proportionally comparable to the pre-2021 period, they still did not fill the hole left by the reduction in note sales because in absolute EUR terms proceeds from judicial strategies and DPOs were 11% and 22% below the February average of the previous three years.

This report shows the performance of a static universe of Italian NPL securitisations originated pre-Covid and rated by Scope. The report is based on monthly servicing reports available to February 2024.

Footnotes:

Figure 1: Six-month average (pre-Covid) refers to the average volumes registered between September 2019 and February 2020.

Figure 2: The variations in total proceeds (%) were computed comparing January 2024 collections with average volumes pre-Covid (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos. 12 and 19. The average drop was computed only considering those transactions with a negative variation, while the average increase was computed only considering transactions with a positive variation.

Figure 3: The % variation is computed comparing February 2024 collections with average volumes registered pre-Covid (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos.19,12 and for the period October 2019 to February 2020 for transaction no. 22.

Figure 4: The variation in judicial proceeds (%) was computed comparing February 2024 collections with average pre-Covid volumes (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos. 12 and 19. The average drop was computed only for transactions showing a negative variation, while the average increase was computed only considering those transactions with a positive variation.

Figure 5: DPO refers to discounted payoff strategies. The decrease and increase in DPO proceeds (%) were computed comparing February 2024 collections with average pre-Covid volumes (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos. 12 and 19. The average drop was computed only considering transactions with a negative variation, while the average increase was computed only considering transactions with a positive variation. Transaction no. 19 does not report DPOs as collection type.

Figure 6: The decrease and increase in note sales proceeds (%) were computed comparing February 2024 collections with average pre-Covid volumes (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos. 12 and 19. The average drop was computed only considering transactions with a negative variation, while the average increase was computed only considering transactions with a positive variation.

Figure 8: "Pre-Covid (6m Avg.*)" refers to the average pre-Covid collections registered between September 2019 and February 2020. The term extra-judicial strategy refers to both DPO and note sales strategies.

Figure 9: "Pre-Covid (6m Avg.*)" refers to average pre-Covid collections between September 2019 and February 2020. The term extra-judicial strategy refers to both DPO and note sales strategies.
