Italian NPL collections: seasonal effects take monthly volumes down by more than half

January 2024 Italian NPL collections of EUR 99m were 56% down month-on-month and 12% below the January average of the three previous years, continuing the declining trend observed throughout 2023.

Based on 20 transactions where the breakdown of collections was specified, judicial proceeds amounted to EUR 64m and extrajudicial strategies EUR 18m, of which EUR 14m from DPOs and EUR 4m from note sales. Two transactions reported EUR 17m in collections but did not provide a breakdown.

This report shows the performance of a static universe of Italian NPL securitisations originated pre-Covid and rated by Scope. The report is based on monthly servicing reports available to January 2024.

Footnotes:

Figure 1: Six-month average (pre-Covid) refers to the average volumes registered between September 2019 and February 2020.

Figure 2: The variations in total proceeds (%) were computed comparing January 2024 collections with average volumes pre-Covid (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos. 12 and 19. The average drop was computed only considering those transactions with a negative variation, while the average increase was computed only considering transactions with a positive variation.

Figure 3: The % variation is computed comparing January 2024 collections with average volumes registered pre-Covid (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos.19,12 and for the period October 2019 to February 2020 for transaction no. 22.

Figure 4: The variation in judicial proceeds (%) was computed comparing January 2024 collections with average pre-Covid volumes (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos. 12 and 19. The average drop was computed only for transactions showing a negative variation, while the average increase was computed only considering those transactions with a positive variation.

Figure 5: DPO refers to discounted payoff strategies. The decrease and increase in DPO proceeds (%) were computed comparing January 2024 collections with average pre-Covid volumes (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos. 12 and 19, The average drop was computed only considering transactions with a negative variation, while the average increase was computed only considering transactions with a positive variation. Transaction no. 19 does not report DPOs as collection type.

Figure 6: The decrease and increase in note sales proceeds (%) were computed comparing January 2024 collections with average pre-Covid volumes (i.e. the six months between September 2019 and February 2020). Based on their closing dates, the average was computed only for December 2019 to February 2020 for transactions nos. 12 and 19, The average drop was computed only considering transactions with a negative variation, while the average increase was computed only considering transactions with a positive variation.

Figure 8: "Pre-Covid (6m Avg.)" refers to the average pre-Covid collections registered between September 2019 and February 2020. The term extra-judicial strategy refers to both DPO and note sales strategies.

Figure 9: "Pre-Covid (6m Avg.)" refers to average pre-Covid collections between September 2019 and February 2020. The term extra-judicial strategy refers to both DPO and note sales strategies.
